

Dear Sirs:

This letter is too inform you or the fcc that xm radio provides me and all the other truckers all across the united states

with all the weather and also all the traffic information that regular radio stations seem to forget about. Untill some one else starts too.

like(xm radio) i get everything i need thru this service and request that you find other means to use my tax paying money.other than waste it on trying too take away from what we or i hold as sacred. im entiteld to all the best information possible especially while im on the road serving AMERICA and keeping her rolling.if none of you at or in the fcc use this service than you would'nt under stand the magnitude of

information that xm radio provides too us all.i think i would to take this petition 04-160 and throw it out the window and find more important issues too spend tax payers money on.and im quite sure you would agree as well.

sinceraly Frederick French
